**Clarification of News Report**

We reply to your request for clarification on the news articles published entitled “Apollo Global announces subsidiary’s start of magnetite mining operations in Cagayan” posted in manilastandard.net on January 31, 2021, it was reported in part that:

“Apollo Global Capital said subsidiary JDVC Resources will start the commercial operations of the country’s first offshore magnetite iron mining project in Cagayan next month.

The company assured the government of a minimal impact on the sea environment as studies by a Singapore-based survey company showed that there is no coral or aquamarine life within the mining area located 150 meters below sea level.

Jun Herrera, JDVC and APL consultant, said the first newly-built deep sea mining vessel arrived in Cagayan and was taking shelter because of strong waves.

Mining operations are expected to start by mid or end-February as soon as the ocean swell subsided, he said.

‘The first vessel has arrived and three more vessels are expected to arrive this year,’ Herrera said.

The vessel is capable of commercial extraction, testing and sampling and production of magnetite iron.

....

Herrera said the mining project, located in the municipalities of Aparri, Buguey and Gonzaga in Cagayan, received funding from the Development Bank of the Philippines,

DBP granted an \$8-million credit line for the JDVC magnetite iron mining project “We have proven to them [DBP] that it’s environmentally safe,” the mining consultant said.

‘The DBP loan has zero borrowings yet as of now, hence, our company remains to be zero debts and internally funded by our shareholders. The DBP loan will only kick off once we have the letter of credit is presented to the bank for the discounting the letter of credit of export buyers to obtain a 90-day working capital to fund the production of the ordered iron ore,’ Herrera said.

....”

Apollo Global Capital, Inc. confirms the information quoted above.
